

**A SYSTEM, METHOD, AND ARTICLE OF MANUFACTURE FOR PHASE
DELIVERY OF COMPONENTS OF A SYSTEM REQUIRED FOR
IMPLEMENTATION OF TECHNOLOGY**

ABSTRACT

A system, method, and article of manufacture are provided for displaying phases of delivery of components of a system by first displaying a pictorial representation of an existing system including a plurality of components. Next, a first set of components are presented that are to be delivered in a first phase. This is accomplished by indicia coding the first set of components in a specific manner. Further, a second set of components are presented that are to be delivered in a second phase. This is carried out by indicia coding the second set of components in a manner unique with respect to the indicia coding of the first set of components.
